Subject: Enough Already!

This country became the Great Country it is because of the free marketplace. Why does the government feel it has the right to control any part or faction of that marketplace. It has to stop before you destroy the initiative of every small business in America. Whenever the opportunity arises for Attorneys of any ilk to practice their trade of twisted truths and distortions especially against the free will of businessmen in America we, as a country take another step towards their great socialist dream.

Thomas Stansbury, Westminster, CA
